Arsenic Detection Kit AJ-05K

The AJ-05 Arsenic Detection Kit is an easy to use, rapid detection kit for All Arsenic containing compounds in food and drink.

Each Kit includes the AJ-05 Detection Pouch for All Arsenic containing compounds and all the supplies necessary to conduct one complete test for Arsenic (except clean water).

The presence of Arsenic at levels immediately dangerous to life and health is indicated with a distinct color change on the detection card.

FEATURES

- Detects all Arsenic containing compounds in levels immediately dangerous to life and health.
- Detects poisons selectively, preventing false negatives and false positives.
- Designed for simple use, even by unskilled personnel in the field.
- Provided with instructional material and all supplies for sample preparation and testing (clean water required).
- Costs significantly less than similar results obtained through laboratory analysis.
- Validated independently by the U.S. Department of Defense (TSWG).

CONTENTS

- AJ-05 Arsenic Detection Pouch
- Cutting Board, Cutlery, Paper Towels, Pair of Latex Gloves, Trash Bag
- Mixing Bowl, Two Eye Droppers
- Full Color Instructions, Reference Sheet, Results Card.

COMMON USES

- VIP / Traveling Dignitary Food Testing
- Food Testing during Field Operations
- Personal Security / Domestic Use

SPECIFICATIONS

Dimensions: 12x12x5 in (30.5x30.5x12.7 cm)

Weight: 6.2 oz (175 g)

Analysis Method: Colorimetric

Shelf Life: 12 Months

Testing Time: 2 - 8 Minutes

Detection Sensitivity: Concentrations less than 1/10 D₅₀ for All Arsenic containing compounds

Storage Temperature: 32 to 75 F (0 to 24 C)
